

Recycled Content Suppliers Index

October 2020

How to use this resource

This resource has been developed to provide an index of current (October 2020) prequalified suppliers who provide recycled content products across applicable managed contracts. This index be regularly updated and available as an online resource from our website.

These prequalified suppliers have undergone a rigorous open tender process that satisfies probity requirements (including the Local Government and ICAC Acts) and aim to help councils achieve best value.

More information on the suppliers, the categories / subcategories are available online. Please visit the managed contract webpage: <https://www.lga.sa.gov.au/lgaprocurement/contracts>

About LGA Procurement

LGA Procurement was established to help South Australian councils undertake best practice procurement and deliver value for money by:

- Developing and maintaining a suite of goods and services contracts that enable councils to access robust, streamlined, aggregated procurement arrangements.
- Providing a comprehensive set of best practice procurement and contracting tools and resources.
- Providing tendering and contracting advice and support services.
- Preparing and managing tenders and tender evaluations on behalf of councils.
- Facilitating the exchange of knowledge about products, services and developments of interest to the sector.
- Delivering professional development and procurement leadership to the sector.

Managed contracts

LGA Procurement has established contracts for the supply of a wide range of goods and services.

When a council chooses to use an LGA Procurement contract it removes the necessity to approach the wider market. This is because LGA Procurement has already undertaken a rigorous open tender process.

Suppliers appointed to each panel have been evaluated and have agreed to contractual terms and conditions that meet the idiosyncratic needs of local government (some of which may be outside of industry-standard trading terms).

Consultancy services

LGA Procurement's experienced practitioners provide assistance and support to councils – from advice over the phone through to a full procurement service. Services can include:

- Procurement planning - acquisition, evaluation and probity planning, market documentation.
- Tendering and evaluation - management of tender processes, evaluation and preparation of reports for council.
- Contracting - contract award, contract documents.

Services can be delivered on a short term or ongoing basis – to provide specialist procurement support, backfill planned absences, supplement existing resources, or help deliver urgent projects requiring significant procurement support.

Procurement resources

A range of resources including fact sheets, model policies, guidelines and contracts have been developed to assist both member councils and suppliers to adopt a consistent and compliant approach to procurement.

Resources are designed to assist councils to meet their legislative obligations including the requirements of the Local Government Act, and the ICAC Act.

Professional development

Procurement is an essential council function and an area of both risk and opportunity. Staff from a wide range of disciplines often play a significant role in establishing managing procurement contracts.

LGA Procurement offers both face-to-face training and eLearning programs developed specifically for South Australian local government.

Sector	Company name	Subcategory	Product name / type	Recycled materials	Manufacture location
Bins					
	Biobag World	Kitchen Caddies	Kitchen caddy	Plastic (TBA)	Netley, SA
	Commercial Systems Australia	Public place	Slat litter bins (Enviroslat only)	Timber, Plastic (TBA)	Kilsyth, VIC
